## Vaccination Nation!

*Stay Safe and Mask Up!*

*Receiving a COVID-19 vaccine is an important step to reduce a person's chance of becoming sick with the COVID-19 disease. Ensuring long term care residents receive the vaccination will help save the lives of those at highest risk for infection and severe illness from COVID-19. Because long term care residents live in group settings and are often older adults with underlying chronic medical conditions, they are the most at risk of severe disease from diseases like COVID-19.*

# **FUN FACT!**

Did you know.....

## **August 1<sup>st</sup> is International Forgiveness Day!**

Forgiveness is the renunciation or cessation of resentment, indignation, or anger because of perceived offence, disagreement, or mistake, or ceasing to demand punishment or restitution. The Oxford English Dictionary defines forgiveness as 'to grant free pardon and to give up all claim on account of an offence or debt'. The concept and benefits of forgiveness have been explored in religious thought, the social sciences, and medicine. Forgiveness may be considered simply in terms of the person who forgives including forgiving themselves, in terms of the person forgiven or in terms of the relationship between the forgiver and the person forgiven. In most contexts, forgiveness is granted without any expectation of restorative justice, and without any response on the part of the offender. In practical terms, it may be necessary for the offender to offer some form of acknowledgement, an apology, or even just ask for forgiveness, for the wronged person to believe himself able to forgive.

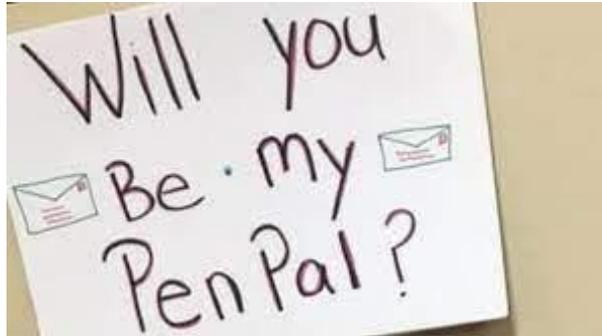

Essentially, forgiveness isn't only for the offender it's also for you.
